1 Introduction

The story of Grandfather Fox represents a myth as told by the Kwaza people of the southwestern Amazon. Kwaza is a highly endangered isolate language with about 25 speakers. The speakers of Kwaza live in two different indigenous reserves and in a nearby village, in the southeastern corner of the Brazilian state of Rondônia, amidst a sea of deforested lands owned by big cattle ranchers and soy farmers. In one of the reserves, Terra Indígena Tubarão-Latundê, the Kwaza and Latundê (northern nambikwara) form minority populations among the Aikanã (isolate). Several mixed Kwaza and Aikanã families live in another reserve, Terra Indígena Kwazá do Rio São Pedro. Despite having a very fragmented speaker community, Kwaza is still the first language of the youngest generation in two families.

This story was told by Edileusa Kwaza, who had learnt it from her late monolingual Kwaza father, Antonhão. As she told the story, Edileusa was accompanied by her partner Zezinho Kwaza. Most of the time, Edileusa and Zezinho live with their children and grandchildren in the little village outside the first reserve, and have very little contact with other Kwaza speakers. It should be considered admirable that, in spite of their Portuguese-only and often anti-indigenous environment, Kwaza is maintained as the family’s home language. The story was
recorded in audio and video formats in August 2014, as part of a documentation project funded through the DoBeS programme. The story has been transcribed and analyzed with the help of Mario Aikanã, a bilingual native speaker of Kwaza and Aikanã who, like most Indians of southeastern Rondônia, also has full command of Portuguese.

The story of Grandfather Fox takes place in mythological times. In those days, animals transformed themselves into humans at will. Grandfather Fox is a very smart animal who has many tricks up his sleeve. In this story, he takes advantage of a young woman after finding out about her plans for the next day. One of the lessons of this and several other traditional stories is that one should avoid
speaking about one’s plans for the future, so as not to attract adversity. The Aikanã also tell a mythological Fox story (chapter 11 in this volume) and, although it is quite different from the Kwaza version, it has a similar edifying message on the danger of referring to future plans. In spite of the enormous cultural and ecological changes that the Kwaza and Aikanã peoples have undergone during the 20th century, this taboo is also still very much part of their present way of life.

Kwaza is a morphologically complex, polysynthetic, suffixing language. Its word order is relatively free. Its word classes are verbs, nouns, adverbs and particles. The only obligatory part of a complete sentence is a verb, which takes inflectional suffixes expressing person and mood, in that order. Person inflections do not seem to be etymologically related to personal pronouns, which are used for disambiguation or emphasis. The person marking system distinguishes inclusive and exclusive first person plural, both inflectionally and pronominally. Third person has zero expression morphologically. There are two sets of mood inflections, distinguishing matrix clause moods such as declarative and interrogative from subordinate clause moods such as conditional, concessional, and cosubordinate. The language has a very productive arsenal of derivational suffixes, which include classifiers, directionals, valency changing morphemes, and nominalizers. Even though the language’s morphological complexity is mainly located in its verb forms, nouns can also be morphologically highly complex due to recursive verbalizing and nominalizing operations. A comprehensive description of the language is van der Voort (2004).

From a linguistic point of view, the Fox story largely reflects the typical grammatical structure of traditional narratives in Kwaza. In principle, the entire story is one long sentence, each chained clause being either in a subordinate mood or in a cosubordinate mood. The story then ends with a fixed formulaic expression in a matrix mood, typically the declarative. If matrix moods are encountered inside the story they usually represent quotations, and either these are followed by a verb of saying in a cosubordinative mood or a cosubordinative mood marker is attached directly to the quoted part. Another characteristic of Kwaza text grammar is anticipatory switch-reference, which indicates that the subject — or perhaps rather the topic — to be foregrounded in the following clause is different from that of the current clause. These rules of thumb also hold for the present text, although some exceptions, indicated in footnotes, can be observed. Finally, many cases of morphological ellipsis can be found in the text, where either the verb stem or the verbal inflection is omitted. Such omitted elements can often be understood from the context, but in some cases verb stem ellipsis signals a quotative construction.
The story is transcribed in the first line in accordance with a practical orthography that was developed for use and established in 2002 by the speakers of Kwaza. The transcription is then segmented morphologically in the second line and glossed in the third line, while the fourth and fifth lines contain free translations into English and Portuguese respectively. Zezinho’s responses are indicated by [brackets]. The <y> corresponds to IPA [j], and the <'> corresponds to IPA [ʔ]. The only exception to the practical orthography concerns IPA [ɛ], which is spelled here as <ɛ> instead of <ee>.

‘Before dawn she would usually take a bath in the river, that’s how she happily lived, but …’

1Recordings of this story are available from https://zenodo.org/record/997445
Ela costumava tomar banho no rio antes de clarear o dia, assim ela vivia feliz, porém ...

Fox se transformou em um homem, e foi falando para a moça, dizendo “Vamos, minha prima, vamos banhar!”

Ele então se aproveitou dela e levou ela nas profundezas do mato e deixou ela lá.

Ao amanhecer o rapaz sempre ia tomar banho com ela, aí entrou na casa dizendo:’

---

2 The combination -tyarahita gives the preceding verbal or zero-verbalized stem the connotation ‘luckily’ or ‘happily’.
3 The exhortative paucal is a matrix mood. Since this is a quoted utterance, it can occur embedded in the overall cosubordinated clause chain.
4 Background knowledge required here is that, every morning, the girl’s cousin mentioned in line (2) calls her to come out and bathe in the river (as is clear from line (6)). Fox has found out about this and takes advantage by pretending to be the girl’s cousin, while it is still dark.
5 The verb root nãi- means ‘to be like, to act thus’. Here it refers to the rape of the girl.
6 The real young man mentioned in line (2). Note also the different subject marker on the verb stem ‘to dawn’, marking discontinuity of the current topic.

7 The combination cwa-ta (ISBJ-CSO) often occurs in narrations with the lexicalized meaning
‘they say’/‘it is said’, and in some clear cases it has been glossed as such. The etymology of the
verb root tyata- ‘say to X’ is not clear, but it probably contains the transitivizer (-ta-).

‘said, while (the agouti was) harassing her and then running away time and again,’

‘falou enquanto (a cutia estava) xingando e correndo o tempo inteiro’

---

8 This is not part of the story. Here Edileusa’s memory briefly fails. She turns to Zezinho, but then immediately picks up the thread of the story again.

9 When one arrives at a swidden crop field, there may be agoutis scurrying around noisily as if intending to tease the visitor.
“Why do you always harass us and run? If you were a person, I’d want you to tell us…”

“Para que você sempre xinga a gente e corre? Se você fosse uma pessoa, eu queria que você contasse …”

“where they have taken my child; I’m really sad because of this,” it is told ...

“para onde eles levaram a minha criança; Estou muito triste por causa disso”, se conta ...

‘He heard it and he went and went into the forest, going after the daughter.’

‘Ele ouviu e ele foi e foi no mato, indo atras da filha.’

‘He found her.] “Apparently you saw mother, so, tell her to bring me back!” she said to him,’

‘[Achou a filha.] Ela falou: “Parece que você viu mamãe. Fala para ela que me traz de volta!”’

---

The switch-reference mood indicates that there will shortly be an important turn of events.

At this stage, Agouti has found the daughter, and she speaks to him, using what is literally a quotative construction (‘Didn’t you say: “I saw mother”.’). The combination hesi or hehɨ̃si also means ‘well, so’ and is used for tail-head linkage.

With the thing for making yarn, with that very thing for spinning yarn, Fox poked Agouti in his ass and it broke off.

Com a coisa para tecer linha, com aquela coisa mesma, Raposa enfiou na bunda do Cutia e quebrou.

That is why people say Agouti has a short tail like that.

Pessoal conta que é por isso que a cutia tem um rabinho curto assim.

Then it is said he was given a crochet bag.

Aí a família da moça deu uma bolsa de tucum para Cutia;

By way of thanks, the girl gave Agouti a traditional type of crochet bag (known in local Portuguese as marico), the yarn of which is handmade out of the fibers of the young leaves of the wade ‘tucuma’ (Astrocaryum tucuma) or hakare ‘buriti’ (Mauritia flexuosa) palm trees.
"Only the girl remained sad (having lost a piece of herself), married to a man."

‘Não, somente a menina ficava na tristeza (porque perdeu um pedaço), agora casou com um homem.’
